

Technical Bulletin

Alcoa Reynobond® and Reynolux® can help earn certification points in the LEED® (Leadership in Environmental and Energy Design) Green Building Rating System™. The most likely categories include:

Materials & Resources: MR Credit 4 – Recycled Content: Use materials with recycled content such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 10% (for 1 point) or 20% (for 2 points), based on total material cost, excluding installation. The table below lists calculated % Recycled Content by Weight for each product.

Materials & Resources: MR Credit 5 – Regional Materials: Use building materials that have been extracted, harvested, or recovered, as well as manufactured within 500 miles of the project site for a minimum of 10% (for 1 point) or 20% (for 2 points), based on total material cost, excluding installation. If only a fraction of a product or material is extracted, harvested, or recovered and manufactured locally, then only that percentage (by weight) can contribute to the regional value. It is possible to earn points in this category when both the final assembly point and the recovery point of recycled content are within 500 miles of the project site. The recovered aluminum used in Reynobond® and Reynolux® are recovered in Mount Holly, SC.

Innovation in Design: ID Credit 1 – Points are awarded for innovative design and/or exemplary performance above the requirements set by LEED. Possible rationale for earning these LEED points includes the above-average recycled content of Reynobond® aluminum alloys and application of low-maintenance painted finish.

Reynobond® ACM	Thickness (mm)	Core*	Weight (lbs/ft ²)	Pre-Consumer	Post-Consumer	LEED Contribution (1.0 x Post + 0.5 x Pre)
RB120PE	3	PE	0.92	19%	21%	30%
RB160PE	4	PE	1.10	15%	18%	25%
RB240PE	6	PE	1.48	11%	13%	19%
RB160FR	4	FR	1.40	12%	14%	20%
Reynobond® Special ACM	Thickness (mm)	Core*	Weight (lbs/ft ²)	Pre-Consumer	Post-Consumer	LEED Contribution (1.0 x Post + 0.5 x Pre)
RB160PE (Anodized)	4	PE	1.10	11%	9%	15%
RB160FR (Anodized)	4	FR	1.40	9%	7%	12%
RB160PE (Kevlar®)**	4	PE	1.12	15%	17%	25%
Reynobond® Natural Metal MCM	Thickness (mm)	Core*	Weight (lbs/ft ²)	Pre-Consumer	Post-Consumer	LEED Contribution (1.0 x Post + 0.5 x Pre)
RB160PENBA (Natural Brushed Aluminum)	4	PE	1.10	16%	12%	20%
RB160FRNBA (Natural Brushed Aluminum)	4	FR	1.40	13%	10%	16%
RB160PESS (Stainless Steel)	4	PE	2.06	7%	43%	47%
RB160FRSS (Stainless Steel)	4	FR	2.36	6%	38%	41%
RB160FRZC (Zinc)	4	FR	2.81	0%	13%	13%
RB160PECP (Copper)	4	PE	2.42	0%	69%	69%
RB160FRCP (Copper)	4	FR	2.71	0%	62%	62%
Reynolux® Profile Material	Thickness (in)	Core*	Weight (lbs/ft ²)	Pre-Consumer	Post-Consumer	LEED Contribution (1.0 x Post + 0.5 x Pre)
All Aluminum Profiles	.032 - .063	n/a	variable	15%	50%	58%

* PE - Polyethylene, FR - Fire Resistance
